HELICOPTER UPGRADE & MAINTENANCE

SAFEX provides a single address for total support to meet the entire range of helicopter requirements.

SAFEX is familiar with all types of military, para-military, and civil helicopters, and has successfully implemented upgrade and maintenance programs on both Western and Eastern platforms.

SAFEX provides the following helicopter services:

■ Expanded mission capabilities

- Night vision adaptations
- Integration of advanced navigation systems, avionics, sensors and weapons
- Reconfigured cockpit layout for more effective helicopter operation
- Improved crew situational awareness with innovative flight safety systems
- Optronic stabilized observation and tracking systems
- Enhanced survivability with advanced self-defense systems

■ Helicopter maintenance at all levels

- General maintenance
- Airframe modifications
- Overhaul of helicopter dynamic components
- Rotor blade repair, including in-house static and dynamic balancing
- Engine repair
- Approved airframe repair fixtures
- Helicopter crash repair

■ Engineering capabilities

■ Technical and logistic support
