MILITARY AIRCRAFT UPGRADE & MAINTENANCE

SAFEX has expertise in all the disciplines required to transform previous generation platforms into advanced, effective systems able to meet today's and tomorrow's most demanding mission requirements.

SAFEX has successfully implemented upgrade programs on a wide range of Eastern and Western aircraft.

SAFEX upgrades provide:

- Enhanced mission performance
- New capabilities
- Cockpit reconfiguration with optimized displays and operation of systems, for reduced pilot workload
- Integration of new avionics, sensors, weapons and EW systems

SAFEX has the infrastructure and experience to support the entire range of military aircraft requirements.

SAFEX has successfully implemented upgrade and maintenance programs on both Western and Eastern platforms.

SAFEX offers:

- Avionics and structural upgrades to meet new operational requirements
- Overhaul, maintenance and structural life extension programs
- Solutions for aging aircraft and obsolete systems
- Engineering services
- Comprehensive integrated logistic support
